About Greece

Greece is strategically located at the crossroads of Europe, Asia and Africa and is comprised of 11 different geographical areas. It has the largest coastline on the Mediterranean Basin and has the 11th longest coastline in the world, with a climate of 300 days of sun per year with a short mild winter season, making it an excellent holiday destination for people all over the world.

Greece has a thriving culture and economy and has always been a budget-friendly destination. Greece and the Greek Islands are known for 3 things: ancient civilization, amazing landscapes and high developed tourism.

Greece is a democratic and developed country with an advanced high-income economy, a high quality of life and a high standard of living.

It has been voted as one of the safest countries with the lowest crime levels in the EU, which is one of the many reasons that it is considered as an ideal destination for permanent residency for non-European Union nationals to migrate to, not forgetting to mention the high quality healthcare and education, as well as the stable political climate.

Greece offers the most competitive Permanent Residency Scheme in Europe including many lifestyle benefits.
